

Vacuum Collector For Palm Oil

Harvesting chestnuts, hazelnuts, walnuts, almonds, pistachios and acorns in places that are awkward to reach is no longer a problem. Thanks to our Vacuum collector you can collect the same amount as three people picking by hand and your investment is repaid in a very short time. This vacuum collector is ergonomic, reliable and the ratio of weight to power is good.

The vacuum collector works best if used together with the blower. The blower will heap and clean the nuts before collecting them. And emptying the tank couldn't be easier, you can do it without taking the machine off your shoulders and complete emptying is guaranteed.

The nuts are partly cleaned thanks to the shape of the tank, The majority of leaves and other unwanted debris are expelled from the tank through the air outlet.

If you have to work where the ground is particularly dirty or has been tilled you can discharge the soil before emptying the tank thanks to the double cover of this model.

Specifications

Motor Type	2 Stroke, Air cooled
Cylinder Capacity	77cc
Engine Power	3.6 kW (5hp) at 7500 revs
Max. Speed in use	6200rpm
Ignition	Electronic
Petrol Oil Mix For 2- Stroke Engines	25/1(4%)
Carburetor	Diaphragm
Fuel Tank Capacity	approx. 1.7litre
Harvesting Tank Capacity	approx. 20litre
Standard Accessories	Bag of tools, Instructions
Weight	13.5kg
Packing Dimension	(40 x 54 x 80)cm

VCPO-77
